

## SECO Minimaster

**Minimaster-Der geniale Allesköninger zum Plan-, Eck-u. Nutenfräsen, Fasen, Zentrierbohren, Kopier-u. Tauchfräsen, Vor- u. Rückwärtssenkern**

- Modernes flexibles Werkzeugsystem bestehend aus verschiedenen Aufnahmen und austauschbaren Hartmetall-Schneidköpfen.
- Kombinationsmöglichkeiten: Eck- oder Nutenfräsen. Planfräsen, Bohren, Fasen, Zentrierbohren oder Kopierfräsen
- Arbeitet mit hohen Drehzahlen. Ideal für präzise Bearbeitung kleiner Werkstücke auf modernen Maschinen u. für moderne Fräswerfahren wie Zirkularinterpolation, Ein-/auswärtskopieren, Bohrzirkularfräsen sowie Tauchfräsen.
- **Verkürzung der Produktionszeit um Faktor 5, d.h. es können 5x höhere Schneid daten erreicht werden.**

Für Hartbearbeitung: Schneidköpfe in PVD-beschichteter Feinstkornsorte sowie extrem verschleissfestem CBN (kubisches Bornitrid). Feinstkornhartmetalle für das direkte Hartfräsen von Formen und Gesenken aus vergütetem Werkzeugstahl mit hoher Oberflächengüte. Oft keine manuelle Nacharbeit nötig.

### Programm

- Schneidköpfe 2 und 3-schneidig, 3-schneidig mit Innenkühlung u. 30° positiv gedrallten Schneiden
- 15 verschiedene Formen von Aufnahmen, 16 verschiedene Schneidköpfe für jede Anwendung

### Spezialitäten:

**Kopierschneidköpfe 3-schneidig mit Innenkühlung**

**Schneidköpfe zum Vor- u. Rückwärtssenkern**

**Schneidköpfe zum Tauchfräsen**

**Minimaster-l'outil génial pour fraiser (rainurage, surfaçage-dressage, rainur. de clavette), chanfreinage, pointage, copiage et in tréflage, double chanfrein**

- Système d'outil moderne et flexible composé de diverse porte-fraises et de têtes de recharge en métal dur
- divers assemblages possible: fraiseage de clavettes, rainures, fraises à surfacer, à percer, à effiler, forêt à centrer ou les fraises à copier
- Travaille avec des tours élevés, idéal pour du travail précis de petites pièces sur des machines modernes et pour des procédés modernes

- **Gain de temps de la production facteur 5, c'est à dire que l'on peut atteindre des données de coupe 5x plus élevées.**

Pour des matériaux durs: Tête de recharge en métal dur MICROGRAIN revêtue par la méthode PVD aussi bien que lames CBN (nidride borique cubique), avec haute résistance à l'usure. Métal dur de grain très fins (MICROGRAIN) pour fraiser des matériaux dur des moules et d'outils d'acières, alliés avec de haute qualité de surface. Souvent pas de retouche nécessaire.

### Programme

- Têtes de coupe 2 -3 dents, 3 dents avec arrosage intérieure et hélice positive de 30°
- 15 différentes géométries des portes-outils, 16 têtes différentes pour chaque application

### Spécialités:

**Têtes de coupe 3-dents pour le copiage munies de conduits d'adduction interne p. le liquide de coupe (3 canaux)**

**Têtes de coupe pour chanfreiner en avant et en arrière**

**A unique end milling system which can combine different solutions offering optimum accessibility in combination with maximum stability & security.**

- Seco Minimaster for 3D milling is available in 2- and 3-flute versions, with 3-flute version it is possible to improve the productivity with higher feed rates, and with 2-flute version it is possible to minimize the risk of vibration.

- Seco have continuously improved and extended the Minimaster range since its introduction in 1988. Today the Minimaster range is close to perfect.

- **Productivity improvements at a factor of 5x, that means cutting data can be increased by 5x**

● The Minimaster system consists of a broad range of different shanks and carbide inserts types. There are no other end milling systems, which are more flexible and varied as Seco Minimaster. There are more than 600 combinations of inserts and shanks for each diameter between 6 and 20 mm.

### Product range

Minimaster is available from 6–20 mm in diameter. The inserts can be ordered in many different versions like under sized inserts for keyway, square shoulder inserts with sharp edges or corner radius. Center drilling, Chamfering 45–60° or double chamfer, high feed inserts, Plunge milling and copy milling inserts in 90–120° ball nose versions.

### Specialities:

**Copy milling heads with 3 teeth and internal cooling (3 canals)**

**Double chamfer heads**

**Têtes de coupe pour le Plunge milling heads tréflage**
